

SPARETECH is like Amazon – but for industrial spare-part-management.

With our platform, we are going to revolutionize how master data and spare part sourcing is done in the future. Besides, we contribute a valuable puzzle piece to the Industry 4.0-vision of a digital twin.

To cope with this challenge, we are using cutting-edge languages, technologies and tools from the field of semantical data management, big data and automated data processing.

**To sum it up:  
SPARETECH is a data driven spare part management startup.**

We are looking for a
